

Justina on Making Sure You Get Wedding Party Pictures

Justina had a lot of wedding picture ideas while planning her 10/18/2008 wedding. But as her wedding date got closer, one wedding picture idea rose to the top: lots of candid wedding guest pictures. After all, Justina figured that she could only bear so many photos of herself. Though she was pleased with the way her photographer documented her and her groom's day, she was disappointed to see so few photos of her guests, as he could only be in one place at one time. Fortunately, when Justina got the pictures back from her rented digital wedding cameras, she found hundreds of great wedding party pictures. Here's Justina's wedding party picture story in her own words:

"Every bride and groom has an image of what their wedding party pictures should look like and capturing those moments on film is invaluable as it allows one to relive those moments for years to come.

For our wedding, we knew that we needed to follow the typical wedding picture ideas such as of the wedding cake, dresses, flowers, family, etc. and that was our main reason for hiring a wedding photographer: to document our day as we remembered it. However, we knew that any photographer is limited to his perspective, for a few short hours, and that he could only be in one place at one time. It was important for us to capture the unique details of our wedding, which is why we [rented digital wedding cameras from CameraRenter](#).

We are so glad that we did! Camera Renter allowed us to see all the fun that our guests had throughout the entire weekend- from the dress rehearsal, to their own personal adventures, to the Sunday brunch. Our photographer did his job of journaling our day, but camera renter is the reason we have so many photos of our closest friends and family.

I am so thankful for camera renter because we had over 500 candid wedding party pictures from our guests! I had no idea how much fun they had with the place settings alone. It was great to see their perspective of our wedding. And my guests loved it too! Disposable cameras do not allow your guests to see the photos they took, they are often of poor quality, and they are more costly. Camera Renter is an environmentally conscious way to take clear wedding party pictures that we and our guests are able to enjoy forever."
